INDICATED FOR **RADIAL ACCESS**

**GLIDESHEATH™ SS Kit**
- For anterior/front wall micropuncture technique
  - Stainless steel needle
  - Stainless steel guidewire
  - Green and yellow bevel indicator

**GLIDESHEATH™ Basic Kit**
- No needle included

**GLIDESHEATH™ Access Kit**
- For double wall/"through and through" micropuncture technique
  - Nonhydrophilic, plastic jacketed guidewire
  - SURFLO micropuncture IV catheter needle
  - Green and yellow bevel indicator

**GLIDESHEATH™ Nitinol Kit**
- For anterior/front wall micropuncture technique
  - Nitinol guidewire
  - Stainless steel needle
  - Green bevel indicator

**GLIDESHEATH™ .035 Kit**
- Appropriate uses of the GLIDESHEATH™ .035:
  - When a 4 or 5 Fr diagnostic procedure turns into an intervention that requires a 6 Fr sheath
  - Use the 6 Fr with the .035 dilator to accommodate the sheath exchange over an .035 "procedural" wire
  - Includes stainless steel .035 J-Tip Guidewire

**UNIQUE DESIGN**

GLIDESHEATH™ is designed and intended for smooth atraumatic radial access to minimize the risk of scarring and damage.
- Offers kink resistance to keep the lumen open throughout the procedure
- Incorporates full-length TERUMO Glide Technology™ to help easy insertion and removal

**Smooth guidewire-to-dilator and dilator-to-sheath transitions**
- Allows easy access

**Color-coded hub**
- For size determination

**Suture eye**
- Aids in securing the sheath to skin

**"Snap-on" dilator lock**
- Helps prevent back-out during insertion

**Unique Terumo cross-cut valve**
- Helps maintain uncompromised hemostasis

**Kink-resistant design**
- Helps keep the lumen open throughout the procedure

**Glide Technology**
- Hydrophilic Coating
- Easier insertion and removal

**Glide Technology Hydrophilic Coating**
- Easier insertion

**Reference instructions for use for procedural guidelines**
