

HydroPearl®

Microspheres

**Indications
Include:**
Prostate Artery
Embolization
(PAE)

A TARGETED APPROACH for precise embolization

Unique Formulation

HydroPearl® Microspheres are the first and only Polyethylene Glycol (PEG) microspheres. The innovative formulation of HydroPearl allows for the microspheres' compressibility and excellent suspension features.^{1*}

Tight Calibration

HydroPearl® is available in a range of sizes from 75 µm to 1100 µm with a tighter size distribution.[†]

This precise calibration may allow for more **predictable and targeted embolization**.^{1,2,‡}

* Suspension characteristics are impacted by amount and density of contrast added as well as particle size..

† 90% or higher of HydroPearl sizes are within specification as indicated on the labels.

‡ Calibration data is 6 lots per each size of randomly selected HydroPearl with 1 lot of competitive products. Sampling done at minimum 150 microspheres per syringe.

PUSHING BOUNDARIES

Terumo Interventional Systems is **committed to your success** with innovative procedural solutions and ongoing support for your most challenging cases.

We are relentlessly seeking new ways to help you achieve **better outcomes for more patients.**

HydroPearl® microspheres are intended for the embolization of:^{3,4}

- Hypervascular tumors
- Uterine fibroids
- Prostatic arteries (PAE) for symptomatic benign prostatic hyperplasia (BPH)
- Arteriovenous malformations (AVMs)
